

## The Challenge

MHS Global was experiencing significant service issues with their previous waste removal partner which included: overflowing dumpsters, long lead times between swap-outs and poor customer service.

When these service issues began to disrupt project timelines and adherence to strict contract rules pertaining to jobsite cleanliness and bin placement, MHS quickly pivoted to evaluate new waste removal partners that could effectively manage their waste removal needs.

## The Solutions

After partnering with Dumpsters.com, MHS Global saw instant changes. They now have:

**One account manager to handle issues quickly**

**Prompt, reliable service with priority scheduling**

**A nationwide network of haulers**

## The Results

MHS Global finishes projects on time with:

- **Savings of 3 to 4 hours per project**
- **34 U.S. sites operating efficiently**
- **617 dumpsters rented YTD**

## The Experience

*“We got quick turnarounds on request, and didn’t have to use a call center. I like the personalized relationship we have with our dedicated Dumpsters.com account manager, Bart Cusick.”*

Nehkeya Clifton, Regional Field Coordinator Lead
