

The Challenge

Vision General Contractors, a national construction company which specializes in retail jobs, struggled to find a national vendor that provided consistent service and met all their job requirements.

No hauler could keep up with their dumpster swap-out requests, which caused delays on remodeling jobs for the largest U.S. retail pharmacy.

The Solution

Dumpsters.com worked with Vision General Contractors to develop a program specifically for these pharmacy jobs, which usually involved 6-10 dumpsters per project.

To prevent delays, Dumpsters.com started delivering two dumpsters at the beginning of each job. Then, they swapped out individual dumpsters as they filled up, preventing costly delays.

The Results

Since this program was initiated in 2018, Vision General Contractors has:

- Maintained cleaner job sites and increased the timeliness of their projects.
- Received the same service for all their pharmacy jobs nationwide from Dumpsters.com.
- Gained more work from the pharmacy company due to their reputation and successful project execution.

Also, the retailer was so impressed with this program that it made it a standard for all store remodels.
